Tenable One Vulnerability Management Specialist Instructor-led Course & OnDemand

Tenable University

Course overview

The Tenable One Vulnerability Management Specialist Course will give you the knowledge and skills you need to effectively utilize our cloud-based vulnerability management solution. It is designed for personnel responsible for identifying, investigating and remediating vulnerabilities and misconfigurations in their business environment.

This course is available as either a two-day Virtual Instructor-Led Training (VILT) or as an On-Demand Training (ODT). Participants will learn how to set up and manage the Tenable One Vulnerability Management platform. Content includes installation and configuration, operations, a technology overview including architecture and design discussions for typical environments, and detailed scanning and analysis instruction.

The course features a blend of lectures, demonstrations, and interactive lab exercises, all designed to promote active engagement and enhance learning outcomes. ODT version includes 16 hours of lab environment access with course purchase. Eligible for CE credit.

Audience

The Tenable One Vulnerability Management Specialist Course is designed for professionals with operational responsibilities who want to expand their knowledge to maximize effectiveness of the solution. It is recommended for those seeking Specialist-level product certification.

Prerequisites

We highly recommend that all participants complete the free **Tenable One Vulnerability Management Introduction** at **Tenable University** before attending this course.

Key benefits

- **Hands-on Lab Environment and Product-based Demonstrations**
  Gain practical, real-world experience with Tenable products in realistic demo and lab-based scenarios.
- **Flexible Scheduling with Live or On-Demand options**
  Live instructors teach courses remotely from multiple time zones to meet your availability requirements. Or, you can watch the comprehensive self-paced video course on your schedule.
- **Knowledge you can use**
  Starting with a firm foundation, progress deeper into deployment planning and vulnerability analysis
- **Prepare for Certification**
  Excellent preparation for Tenable One Vulnerability Management Specialist Certification.

About Tenable

Tenable is the exposure management company, exposing and closing the cybersecurity gaps that erode business value, reputation and trust. The company's AI-powered exposure management platform radically unifies security visibility, insight and action across the attack surface, equipping modern organizations to protect against attacks from IT infrastructure to cloud environments to critical infrastructure and everywhere in between. By protecting enterprises from security exposure, Tenable reduces business risk for over 40,000 customers around the globe. Learn more at tenable.com.
